Professional Profile

As a DIT, I am committed to take the best possible care of your footage. I have experience working on different sets in various genres and locations.

I always strive to provide a quick and reliable service, understanding the importance and responsibility of my job.

My regular duties include copying and backing up video and audio files, organizing them according to customer preferences, creating proxy files, syncing audio, applying basic color grade on set and providing reference shots for the DOP.

Being also a Video Editor, I can provide a rough cut on set if required.

I have a Masters in Fine Arts, specializing in Craft Editing from Ravensbourne University London, where I honed my skills in narrative, visual, and sound design, using industry-standard software and equipment.

I am proficient in Adobe Premiere Pro, Adobe Photoshop, Adobe Illustrator, and Adobe After Effects. I can work with graphics, sound effects, color grading, and basic animation.

I am highly organized, responsible, meticulous, and able to work independently as well as being a part of a team. I value collaboration, communication, and feedback, and I always strive to deliver high-quality work that meets the client's vision and expectations.

I received an award for Excellence in Editing from Women in Film and Television MENA.

You can find examples of my work here: [My Portfolio](#)
