PROFILE

Steadicam/trinity2, camera, drone, handwheels and remote head operator with more than 22 years of experience in TV, live broadcasting, cinema, commercials, ENG, news, music and corporate videos.

"When I was a child, my fascination with photography began in my father's homemade lab. I recall sneaking in and accidentally exposing a film roll, sparking curiosity. What's shutter speed? What's aperture for? My inquiries knew no bounds.

My audiovisual career took off in 2003, shaped by Sports broadcasting and TV. Over 1,000 broadcasts honed my skills in dynamism, precision and speed.

In 2008, doing my steadicam workshop opened doors to advertising but also to feature films and TV series.

Here, I discovered my true passion: storytelling through camera movement, with the story at its heart. This marked the beginning of my vocation, rooted in that photo darkroom."
